SOMERSET LONDON

February, 1953

Dear Motorist,

You will have heard the name National Benzole
Makes Good Petrol. You have seen the sign. You have used
National Benzole. You have discovered this to
be true. If not, we will give you some logical
and convincing reasons for an immediate trial.

There are ten reasons why National Benzole makes good
petrol better. We have enclosed a little booklet,
which we present with our compliments, to ensure that
after reading it, you will be inclined to try
National Benzole Mixture.

Afterwards, when you have checked the extra mileage
and noticed how much sweeter your car is running, don't keep
the good news to yourself. Let a motoring friend know it too.
We shall be happy to send him a copy of our booklet. Just fill
in the enclosed prepaid card with his name and address, and pop
it in the letter box.

Yours sincerely

"Mr. Mercury"

POR-15® Restoration Products

POR-15 CYCLE TANK REPAIR KIT

Application Information

PLEASE FUEL TANK REPAIR KIT
PLEASE READ THIS INFORMATION CAREFULLY BEFORE
ATTEMPTING TO REPAIR YOUR FUEL OR UTILITY TANK.

Kit Contains

- 1-Quart (946mls) Marine Clean
- 1-Quart (946mls) Metal Ready
- 1-8-oz (229mls) Gas Tank Sealer
- 1-1/2 lbs of repair cloth
- 1-1/2 lbs of repair cloth

SUGGESTED SUPPLEMENTAL SUPPLIES

- Latex Gloves
- Eye Protection
- Bucket and access to hot water and a garden hose
- Soft rags for wiping any chemical spills on the exterior of the tank
- Duct tape for sealing up openings in the tank (petcock hole, etc.)
- Work bench and/or soft padding to lay the tank on
- Sandpaper

THESE DIRECTIONS ARE FOR STEEL TANKS ONLY

Metal-Ready will enable your POR-15 Fuel Tank Sealer to chemically bond with whatever rust may remain in the tank and form a permanent non-porous barrier against further rusting. The primary job of Metal-Ready is to change the pH of your tank from alkaline to acid, because coatings and paints stick much better to acid-creeped metals. Be sure to rinse your tank thoroughly with water afterward, neutralizing the surface.

TANK SEALER

The Tank Sealer in your kit is impervious to all conventional automotive and diesel fuels. The most important thing to remember is that your tank must be totally, completely bone-dry before the sealer can be poured into it.

DIRECTIONS

The preparation products, though non-toxic, should be handled with latex gloves and eye protection.

1. PREPARATION: Empty tank of all fuel and rinse out with
